All rights reserved. No part of this publication may be reproduced, stored in a retrieval system, or transmitted, in any form or by any means, electronic, mechanical, photocopying, recording, or otherwise, without permission in writing from the publisher.

Submission to this journal of a paper entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S. 351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.

Special regulations for readers in the U.S.A. This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 21 Congress Street, SALEM, MA 01970 (U.S.A.). If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of U.S. $2.25, also payable through the Center. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purpose, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

Special regulations for authors in the U.S.A. Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information under the U.S. Copyright Law.

Special Issue

Cytogenetic Response in vivo to Ionizing Radiations in Somatic and Germ Cells of Mammals including Man

ELSEVIER BIOMEDICAL PRESS
AMSTERDAM

Mutation Research, 95 (1982) 527–529
Elsevier Biomedical Press

Contents

Volume 95 (1982)

Special issue
Cytogenetic response in vivo to ionizing radiations in somatic and germ cells of mammals, including man

Preface
by D. de Nettancourt (Brussels/Mol) vii
Mechanisms for chromosomal aberrations in mammalian cells
by A.T. Natarajan and T.S.B. Zwanenburg (Leiden) 1– 6
Frequency and distribution studies of asymmetrical versus symmetrical chromosome aberrations
by John R.K. Savage and D.G. Papworth (Harwell) 7– 18
Cytogenetic study of skin fibroblasts in a case of accidental acute irradiation
by Martine Mouthuy and Bernard Dutrillaux (Paris and Fontenay aux Roses) 19– 30
The lymphocytes of small mammals
A model for research in cytogenetics?
by A. Léonard, G. Decat and L. Fabry (Mol) 31– 44
Ultrastructural characterization of the meiotic prophase
A tool in the assessment of radiation damage in man
by Preben Bach Holm, Søren Wilken Rasmussen and Diter von Wettstein (Copenhagen) 45– 59
Cytogenetic effects of protracted gamma exposures from conception of male mice
by A.G. Searle and C.V. Beechey (Harwell) 61– 68
Absence of correlation between the chromosomal radiosensitivity of peripheral blood lymphocytes and stem-cell spermatogonia in mammals
by Paul P.W. van Buul (Leiden) 69– 77

[*End of Special Issue*]

Prophage induction and mutagenicity of a series of anti-tumour platinum(II) and platinum(IV) co-ordination complexes
by I.E. Mattern, L. Cochiarella, C.G. van Kralingen and P.H.M. Lohman (Rijswijk) . . . 79– 93
Action spectrum for the in vitro induction of simian virus 40 by ultraviolet radiation
by Thomas P. Coohill, Sharon P. Moore, Daniel J. Knauer, Dennis G. Fry, Timothy J. Eichenbrenner and Larry E. Bockstahler (Bowling Green, Louisville and Rockville) . . . 95–103
Mutagenic, teratogenic and pharmacokinetic properties of cyclophosphamide and some of its deuterated derivatives
by H. Nau, H. Spielmann, C.M. Lo Turco Mortler, K. Winckler, L. Reidel and G. Obe (Berlin and Frankfurt) 105–118
Inhibition of mutagenicity of a model nitrosation reaction by naturally occurring phenolics, coffee and tea
by H.F. Stich, M.P. Rosin and L. Bryson (Vancouver) 119–128

0027-5107/82/0000–0000/$02.75 © Elsevier Biomedical Press

Mutation and growth rates from Luria–Delbrück fluctuation tests
by Arthur L. Koch (Bloomington) 129–143
Antimutagenic action of cobaltous chloride on Trp-P-1-induced mutations in *Salmonella typhimurium* TA98 and TA1538
by Hajime Mochizuki and Tsuneo Kada (Mishima) 145–157
Metabolic activation of 2-amino-9*H*-pyrido[2,3-*b*]indole by rat-liver microsomes
by Taeko Niwa, Yasushi Yamazoe and Ryuichi Kato (Tokyo) 159–170
Visible light mutagenesis in *Escherichia coli*
by L.D. McGinty and R.G. Fowler (San Jose) 171–181
The effect of glutathione conjugation and microsomal oxidation on the mutagenicity of dichloromethane in *S. typhimurium*
by W.M.F. Jongen, E.G.M. Harmsen, G.M. Alink and J.H. Koeman (Wageningen) ... 183–189
The *B. subtilis* multigene sporulation test for mutagens: detection of mutagens inactive in the Salmonella *his* reversion test
by L.E. Sacks and J.T. MacGregor (Berkeley) 191–202
DNA repair synthesis in toluenized *Escherichia coli* treated with 8-methoxypsoralen and 365-nm light
by Duncan McGarva and Peter Strike (Liverpool) 203–211
Genetic control of budding-cell resistance in the diploid yeast *Saccharomyces cerevisiae* exposed to γ-radiation
by B.S. Rao and N.M.S. Reddy (Bombay) 213–224
Hybrid dysgenesis in *Drosophila melanogaster*
I. Further evidence for and characterization of the mutator effect of the inducer-reactive interaction
by Jacqueline Proust and Claude Prudhommeau (Orsay) 225–235
Mutagenesis of spermatozoa of *Drosophila melanogaster* by cross-linking agents depends on the *mus(1)101*$^+$ gene product in the oocyte
by Ulrich Graf, Albert Kägi and Friedrich E. Würgler (Schwerzenbach) 237–249
Histocompatibility gene mutation rates, spontaneous and induced by the chemical mutagen procarbazine
by D. Harnasch and R. Stumpf (Freiburg) 251–262
Development of a new biochemical mutation test in mice based upon measurement of enzyme activities
I. Theoretical concepts and basic procedure
by Ritchie J. Feuers, Jack B. Bishop, Robert R. Delongchamp and Daniel A. Casciano (Jefferson) 263–271
Development of a new biochemical mutation test in mice based upon measurement of enzyme activities
II. Test results with ethyl methanesulfonate (EMS)
by Jack B. Bishop and Ritchie J. Feuers (Jefferson) 273–285
Similar dose-related chromosome non-disjunction in young and old female mice after X-irradiation
by C. Tease (Harwell) 287–296
Quantitative forward-mutation specificity of mono-functional alkylating agents, ICR-191, and aflatoxin B_1 in mouse lymphoma cells
by Mark A. MacInnes, Ursula Friedrich, Ted van Daalen Wetters and Philip Coffino (San Francisco and Freiburg) 297–311
Studies on three mutagen-sensitive mutants of mouse L5178Y cells
I. Characterization of the hybrids between L5178Y and mutagen-sensitive mutants
by Tadahiro Shiomi, Naoko Hieda-Shiomi and Koki Sato (Chiba-shi) 313–325
Studies on three mutagen-sensitive mutants of mouse L5178Y cells
II. Complementation analyses between two methyl methanesulfonate-sensitive mutants and between two 4-nitroquinoline-1-oxide-sensitive mutants
by Tadahiro Shiomi, Naoko Hieda-Shiomi and Koki Sato (Chiba-shi) 327–337

Relative sensitivity of V79 and V79/79 cells to spontaneous and induced mutation to 6-thioguanine and ouabain resistance
by M. Fox, S. McMillan, L. Durrant and J.M. Boyle (Manchester) 339–352
Expression time for benzo[*a*]pyrene-induced 6-thioguanine-resistant mutations in V79 Chinese hamster cells
by Leila Diamond, Francis Kruszewski and William M. Baird (Philadelphia) 353–362
Enumeration of thioguanine-resistant lymphocytes using autoradiography
by Alexander A. Morley, Simon Cox, Dianne Wigmore, Ram Seshadri and John L. Dempsey (Bedford Park and London) 363–375
Effect of metabolic activation on the cytotoxicity and mutagencity of 1,2-dibromoethane in the CHO/HGPRT system
by Patricia A. Brimer, Eng-Lay Tan and Abraham W. Hsie (Oak Ridge) 377–388
Initial rates of DNA incision in UV-irradiated human cells
Differences between normal, xeroderma pigmentosum and tumour cells
by Shoshana Squires, R.T. Johnson and Andrew R.S. Collins (Cambridge) 389–404
Abilities of extracts of human lymphocytes to remove O^6-methylguanine from DNA
by Evelyn A. Waldstein, En-Hua Cao, Michael A Bender and R.B. Setlow (Upton) 405–416
Ultraviolet light inactivation of zinc-mediated metallothionein induction in normal and repair-deficient human cells
by C.E. Hildebrand and G.F. Strniste (Los Alamos) 417–426
A CHO-cell strain having hypersensitivity to mutagens, a defect in DNA strand-break repair, and an extraordinary baseline frequency of sister-chromatid exchange
by L.H. Thompson, K.W. Brookman, L.E. Dillehay, A.V. Carrano, J.A. Mazrimas, C.L. Mooney and J.L. Minkler (Livermore) 427–440
The effects of bifunctional alkylating agents on DNA synthesis in sensitive and resistant Yoshida cells
by F.J. Carr and B.W. Fox (Manchester) 441–456
Antimutagenic action of mammalian placental extracts on mutations induced in *Escherichia coli* by UV radiation, γ-rays and *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine
by Hajime Mochizuki and Tsuneo Kada (Mishima) 457–474
Caffeine-metabolizing capability of primary rat hepatocytes, Chinese hamster V79 cells and normal human fibroblasts in culture
by A.S. Tu, R.S. Robertson, M.M. Callahan and P.S. Thayer (Cambridge, MA) 475–492
Demonstration of recovery from the potentially mutagenic effects of ultraviolet light by replication-inhibited Chinese hamster V79 cells
by Donna S. Stone-Wolff and Toby G. Rossman (New York) 493–503
Repair capability and the cellular age response for killing and mutation induction after UV
by Richard Dean Wood and H. John Burki (Berkeley) 505–514
Normal formation and repair of γ-radiation-induced single and double strand DNA breaks in Down syndrome fibroblasts
by Marie E. Steiner and William G. Woods (Minneapolis) 515–523
